

# Geometric Flows and Geometric Operators in Pisa

Centro Ennio De Giorgi – Scuola Normale Superiore di Pisa, 29 June – 3 July 2009

In collaboration with INdAM

This meeting is one of the events of the intensive research trimester on *geometric flows and operators* which is having place in Pisa during May/June/July 2009. The website of the trimester is at <http://cvgmt.sns.it/GFO>

The talks will concern conformally invariant operators, functionals depending on the curvatures and related PDEs, geometric flows, in particular Ricci and mean curvature flow, and relations of these topics to geometry and theoretical physics.

Some financial support is available for young students.

Interested people can register at the website of the conference at <http://cvgmt.sns.it/GFO-Conf>

## Speakers will include:

***R. Alessandroni, C. Baker, L. Bessières, G. Besson, F. Bonsante, E. Cabezas-Rivas, G. Catino, E. Hebey, T. Lamm, P. LeFloch, L. Martinazzi, L. Mazziere, R. Müller, M. Novaga, M. Rupflin, H. Seshadri, W. Sheng, M. Simon, C. Sinestrari, J. Streets, M. Struwe, G. Tarantello***

**Organizing Committee:** Luigi Ambrosio (Scuola Normale Superiore, Pisa),  
Zindine Djadli (Institut Fourier, Grenoble), Andrea Malchiodi (SISSA, Trieste),  
Carlo Mantegazza (Scuola Normale Superiore, Pisa)
